Future Forum

This issue of our Newsletter in Social and Human Forecasting is the sixth and we are pleased to say that the information for it and the comments sent on it are increasing every month

It may also be noted that this issue is able to offer "ideas on the future" sent by the readers We very much hope this may really become an informal and easy forum of exchange between the readers from various parts of the world, of various ages, from the various contexts

We would like to underline that the Newsletter is not simply a mean of information but a way of intercommunication, a service between the people that send the information and the people who receive it

This publication is a letter through which all may communicate to all

1) Any information which is considered to be of particular interest and relevance to the efforts now being made to anticipate needs, means, appropriate goals and to our emerging world community

2) Any ideal it is useful to exchange with others, of concerning which information is required

The editing group will always be glad to meet any of the readers who happen to pass through Rome

IRADES, 6 via Paisiello, 00198 Roma, tel 866 346, Italy

The International Society for Technology Assessment (ISTA) is a new world membership organization concerned with the conduct of these activities and studies. Technology Assessment gives a means for developing options which will allow society to find democratic ways and means to preserve and improve the quality of human life. The growing awareness that scientific and technical growth have undesirable and dangerous consequences has led to movements within and without science to find means for predicting these consequences and producing options which minimize the bad and maximize the desirable effects.

ISTA is established as an international society. Its offices are located in The Hague, The Netherlands, and in Washington, DC, USA.

ISTA will publish its own periodical "Technology Assessment".

ISTA will also sponsor an international conference program.

The First International Congress will be held at The Hague, The Netherlands, in March of 1973.

Members will receive

1 Journal (Quarterly), 2 Consultative Referral Service, w3 Trips-on-site, 4 Discount at First International Meeting, w5 Newsletter

(Further information: The International Society for Technology Assessment, P O Box 9058, The Hague, The Netherlands)

A Center for Policy Alternatives has been established in the School of Engineering at the Massachusetts Institute of Technology to foster the application of technology to the solution of social problems. Dr. J. Herbert Hollomon, former president of the University of Oklahoma, has been appointed its first director. The new Center will study and investigate substantive issues related to society, particularly those in which technology and engineering

ORGANIZATIONS

AIMS, INTENTIONS, ACTIVITIES OF GROUPS

could play significant roles, and will seek close cooperation from throughout the Institute in pursuing its research

The Center will consist of associated faculty members and students and will have a small permanent core staff and part-time participants from throughout the Institute and from the outside world

(Further information School of Engineering, Massachusetts Institute of Technology, Cambridge, Massachusetts, 02139 USA)

INDIVIDUALS **2**

INTENTIONS, CHANGE OF ADDRESS

Ivan Ma'lek, Academician, University professor, Za'br'eh (Czechoslovakia)

Present professional activities and specialization in the field of forecasting Biology for the Future of Mankind Education for the future especially from the point of view of development of Human Creativity, Human Environment and its preservation and formation

(Further information Ivan Ma'lek, Institute of Microbiology, Czechoslovakian Academy of Sciences, Budejovicka 270/c Praha 4 - Krc, Czechoslovakia)

The Association for the Advancement of Psychotherapy, under the presidency of Stanley Lesse, M D , has sponsored a series of meetings that have attempted to bring to light changing psychosocial patterns. In March, 1971, it sponsored a meeting entitled "*Women and our Changing Family Structure*"

On March 16, 1972, it sponsored a dealing with "*The Changing Image of Masculinity in our Current Society*"

On April 30 the Association for the Advancement of Psychotherapy sponsored a meeting entitled "*Prophylactic Psychotherapy – Theoretic and Procedural Considerations*", This meeting is the first to be held on the subject of the use of psychotherapy as a preventative tool in the attempt to avoid future psychic decompensation by individuals or groups. This meeting was held in the Sheraton Dallas Hotel in Dallas Texas

(Further information Mr Stanley Lesse, M D American Journal of Psychotherapy New York, N Y 10024 USA)

The Common Future of Men, will be organized in Bucarest
Romania from the 4th to the 11th of september 1972

The Romanian Organizing Committee

President Professor Manea Manescu, President of the Economic
Council of the S R of Romania, Vice-presidents Professor Miron
Constantinescu, President of the Academy of Social and Political
Sciences and Professor Mircea Malita, Minister of Education,
Members Pavel Apostol, Mihai C Botez, Ion Cornea, Ion
Desmireanu, Emilian Dobrescu, Gheorghe Dolgu, Emanoil
Florescu, Erno Gall, Dumitru Ghise, Ion Goliat, Constantin
Ionescu, Cezar Lazarescu, Roman Moldavan, Edmond Nicolau, Ion
Niculescu, Constantin Petre, Remus Radulet, Valter Roman,
Cristofor Simionescu, Nicolae Teodorescu, Constantin Vlad,
Stefan Voicu

Address of The Romanian Organizing Committee

Third World Future Research Conference, Bucharest I, Calea
Victoriei 125, Romania Phone 14 51 90 and 14 79 55

Conference Offices

The Secretariat will function in the Conference building and the
address mentioned above

Special information bureaus of the Conference will be open at
Bucharest - North Railway and the Otopeni - Bucharest Airport
during 1-4 september

Working Sessions and Organization of Proceedings

The Conference will proceed according to the following general
outline

– Ceremonial Opening Session – Plenary sessions where

EVENTS

MEETINGS, COURSES, LECTURES, EXHIBITIONS

introductory lectures will be presented – Working groups,
seminars, and round tables where introductory lectures, invited
comments and papers will be delivered – Closing Session

The Directorate, in its meeting of April 22, 1972, has worked out
the final program of the Conference, as follows

General theme *The Common Future of Men*

The topics of the plenary sessions are

– The Role of Science in Social Innovation – Methods to
Approach the Future – Education for the Future –
Representations of Different Peoples on their own Futures – The
Future of Interindividual Relations – Future Research A Second
Look

Special Program There will be one free morning, and for those
interested in participating, there is scheduled a joint debate with
the International Marketing Federation on the topic “The Future
of Consumption”

The topics of the working groups, panel discussion, seminars and
round tables are

– Mathematical Models in Future Research – Models of
International Relations – Long Range Ecological Policy –
Information Technology Threats and Promises – Planning for
Educational Innovation – Communication Problems related to
Future Studies – New Concepts of Growth and the Economic
Future – Assessment of Future Technology – The Future of
Man’s Work – The Future of Developing Countries – The Future
of Time Budgeting – Research and Action in the Study and
Creation of the Future – Industrial Enterprises of the Future and
their Management – Possibilities of and Perspectives on “Soft
Technology” – Creativity of the Common Man – Working group
devoted to the theme of the special program on “The Future of
Consumption”

EVENTS

MEETINGS, COURSES, LECTURES, EXHIBITIONS

Languages of the Conference

The official languages of the Conference are English, French, German and Russian

The Newsletter of the Conference will be printed in English

Other Activities

A large round table is planned to be held concurrently with the Conference on the Conference on The Future of Youth And Youth Of The Future Participants can attend this round table with a special invitation issued by a separate Youth Organizing Committee

During the Conference there will also be a working meeting of the Futurology Commission of the International Sociological Association

The Romanian Center for Information and Documentation in Social and Political Sciences will organize an exhibition of World Literature in Future Research as well as a special meeting on Information And Documentation in Future Studies

A Future Creating Workshop will also be available to Conference participants

Registration

Persons wishing to take part in the Conference should register not later than August 1, 1972

(Further information Thrd World Future Research Conference Bucharest I, Calea Victoriei 125, Romania)

Engineering Involvement Is organized on June 19-22, 1972 at Texas Tech Universites, Lubbock, Texas

The subject of discussion at the 80th Annual Conference of the American Society for Engineering Education moves on to another level – to examine the what and how of teaching and practice so that present and future engineers and technicians can play an

Technology assessment and quality of life is the 4th General SAINT – Conference to be held September 24-28, 1972, Schloss Leopoldskron, Salzburg, Austria

This international conference, covering a wide spectrum of presentations and discussions, will be an attempt to correlate the Technology assessment movement with those elements and dimensions of Quality of Life for which new technologies have a particular bearing

Problem-oriented scientists from various disciplines as well as experts working on the "front" of technology planning in government, industry, national and international organizations will display the conference theme with respect to its conceptual, methodological, and empirical aspects, including scenario development and case studies for demonstration and specification

Preliminary Programme Outline

Opening Session The Problem- "Landscape"

Topic 1 The Development of New Technologies – The Two Faces

EVENTS

MEETINGS, COURSES, LECTURES, EXHIBITIONS

Regarding Quality of Life

Topic 2 The Process of Industrial Production and its Impact on Quality of Life

Topic 3 Assessing the Distribution and Consumption of New Technologies

Topic 4 Institutional and Organizational Patterns and Mechanism of Technology Assessment

Closing Session New Concepts of Social Commitment in Technology Assessment

(Further information Mr Louis Turner, Secretary of SAINT, Department of Sociology, Salford University, Salford 5, Lancashire, U K)

Future Oriented Psychotherapy This is a technique that has been gradually evolved by Stanley Lesse, M D , Editor-in-Chief, *American Journal of Psychotherapy*

(Further information Stanley Lesse, M D Editor-in-Chief, American Journal of Psychotherapy, New York, New York 10024, USA)

The Group of Social Prognoses, Institute of Philosophy and Sociology, Polish Academy of Sciences On going research and studies 1) problems of changes of 'style of life', 2) indicators of cultural changes, 3) prognostication and planning in culture, 4) basic methodological problems of social prognostication

(Further information Mr Andrzej Siciński, Institute of Philosophy and Sociology, Polish Academy of Sciences, Warszawa, Nowy Swiat 72, Poland)

Problem possibility focusers are a new type of document They are not designed to set down the views of single person about an issue, rather they attempt to set out the present state of knowledge about the problem possibility under discussion – in this case, the future Current agreements and disagreements are stated as clearly as possible Ideas being advanced to settle the present disagreements are also developed In addition, resource material which may help to clarify the nature of the present disagreements are listed

The process of attempting to state the agreements more clearly and to resolve present disagreements is continuous

(Further information Problem/Possibility, Swallow Press, 1139 S Wabash Avenue, Chicago, Illinois 60605, USA)

ACTIVITIES

ON GOING RESEARCH AND STUDIES

SYNCON – a synergistic convergence to explore a proposal for a positive future – a new process for individuals and groups from all backgrounds to examine their own “next step” forward in the context of the growing capacities of mankind as a whole – an experiment in democratic decision-making to overcome the adversary mode of conflict resolution – an exercise in anticipatory problem-solving

Sponsored by the Committee for the future, a non-profit organization of citizens from many fields of endeavor advocating “new worlds on earth – new worlds in space”, through the employment of all man’s evolving capacities (tech , psych , spir) to achieve a positive future All functions, interests, talents, needs included SYNCON will take place in Southern Illinois University, located in Carbondale, SIU-Carbondale is an ideal environment for the first universal SYNCON, May 17-21, 1972

(Further information Advanced Registration New Worlds Week, Department of Higher Education, Southern Illinois University, Carbondale, Illinois 62901, USA)

FUTURE FORUM

"I am afraid that there will no answer to the problem posed by 'Social Forecasting versus Elite Forecasting' n 5 of this Newsletter, because people do not want to discuss it "

Ruggero Boscu, Rome, Italy

The lay public for the experts or the experts for the lay public?

Is this possible, is this thinkable, is this welcomed, at all? Indeed, there is much talking and writing about broader participation of the public in decision processes Radio, TV, computer democracy, etc are discussed and tested Well, *button democracy* is in the making - this way or the other way Yet, what is changing? Will the little man in the street really be more capable to participate in decisions than before? If the button is pressed without getting fundamental learning possibilities, information or illumination then there will be no qualitative change

How can progressive communication methods and techniques be used in learning processes

- Which are tied to the *particular needs and interests*
- so that a *mutually satisfactory communication process can be taking place*

- in order to create an *equal information level* as the pre-requisite for more participatory and democratic decisions?

N M Ralf B Ziegler

Dokumentation fur Graue Leturatur Zukunftsforschung, 1, Berlin 15, Kurfurstendamm 196, VI Germany

Meditation – Therapy

In the developed countries of the Western hemisphere people are suffering from intense tension that results in cerebral and respiratory diseases, often with fatal results. The causes are part of environmental pollution, but social and psychological breakdown is no less important in this. Mental disorders are on the increase and people need to be re-assured of their own potential power, energy and health. Out of the general method that have been tried in group study one that has worked wonders is Meditation that gives in the persons a feeling of relaxation, inner glow and confidence in carrying on their day to day activities more purposefully than before.

Hundreds of people have derived benefits in this Meditation-Therapy.

It is fully scientific and the success of the treatment is certified by the person concerned rather than by those who give them treatment.

Dr Puri, with his colleagues is running regular weekly classes with the attendance that varies between 50-60.

(Further information: Dr Gopal Puri, Liverpool Polytechnic, Liverpool 3 U.K., 3 SF)
